In the second road race we had a major crash in the 4th lap which forced the organization to stop the race. Instead of having no results we (organization and EHF representatives) decided to use the times after the third lap. Participants with the same time got the same points for the overall event ranking as well for the EHC ranking. In this situation it was the most fair solution in our opinion, because we had no final sprint. This was the most visual in the MH3 division with 3 1st places, 2 4th places and 2 9th places. Hopefully you understand how we had to make this decision and understands why we did this.
